1.Warning

It is important to have a thorough understanding of your new electric scooter so that you can achieve the best performance, comfort, fun, and safety while cycling. To understand the new scooter and its correct operation, you should first carefully read the manual.

It is important to ride for the first time in a safe and controlled manner. For example, stay away from cars, obstacles, and other riders. It should be prohibited to enter highways, motor vehicle lanes, public lanes, reverse traffic, and avoid cycling in the rain. When encountering waterlogged roads, you should slow down and detour.

Scooters are vehicles with certain risks. Do not use mobile phones or wear headphones while cycling. It is necessary to understand the traffic rules for riding electric scooters on local public roads. When you ride every time, you should follow the rules. For your own safety, don't forget to wear a qualified helmet before getting on the scooter. It is recommended to use protective equipment such as elbow and knee pads to provide better protection.

When electric scooters are supplied, there is no basic mandatory equipment, and the situation may vary in different regions. Therefore, if you plan to use electric scooters on public roads, it is necessary to equip electric scooters with basic mandatory equipment in accordance with relevant laws and regulations.

This product is designed specifically for your personal use. Do not use it for commercial or other purposes.

Please keep this manual properly for reference.

2.Caution

Before cycling, the tire pressure should be checked, the handlebars should be installed correctly and securely. Please ensure that the battery is fully charged. If the battery is low during cycling, please keep the vehicle moving slowly and steadily. Charging should be done as soon as possible.

Before each charging, please check the charger, cables, and plugs. If there is any damage, do not use a charger.

When braking on slippery roads, the braking distance is usually longer than on dry roads. Therefore, it is necessary to brake earlier to park more safely.

You should try to avoid using electric scooters on rainy, stormy, or snowy days. If electrical components (control units, engines, and batteries) become damp or submerged, irreversible damage can occur, even leading to battery explosion.

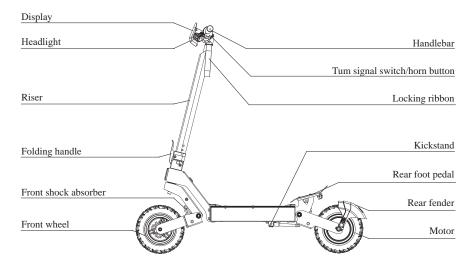

This product can only be used by one adult at a time. Do not carry any additional passengers. If you feel uncomfortable or under the influence of alcohol or drugs, please do not ride a scooter.

The vehicle is not a toy. Like other vehicles, there is a possibility of falling, colliding, or encountering other dangerous situations. Please do not provide your electric scooter to anyone who does not know how to use it correctly. If you allow others to ride your scooter, it is your responsibility to ensure that all riders are aware of all warnings, precautions, instructions, and safety precautions, and to ensure that they are able to use this product safely and responsibly, and to protect themselves and others from harm.

Electric scooters should be kept away from flammable materials and open flames.

3.Sketch map

Note: The noise of the vehicle is less than 70 dB.

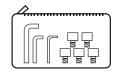

4.Argument list

Product name	KuKirin G2		
Size	Folded size	1258*660*540mm	
	Unfolded size	1258*660*1260mm	
	Maximum speed	≤ 25 km/h	
	Medium-speed endurance	≤ 55 km	
	Maximum slope	≤ 20°	
	Tires	10 inch off-road tires	
Parameters	Shock-absorbing	Front and rear spring damping	
	Waterproof	IP54	
	Brakes	Front and rear disc brakes	
	Display device	Speed, mileage, battery level, front light, etc.	
	Lighting	LED	
Battery data	Input voltage	100~240V/50~60Hz	
	Voltage/Capacity	48V/15Ah	
	Charging time	54.6V/2A chargers, charging takes about 9 hours.	
Maximum load	Maximum load	120 kg	
Weight	Net weight	About 26 kg	

5.Packing list

1.User's manual*1

2.Tool kit and screw accessories

3.Charger*1

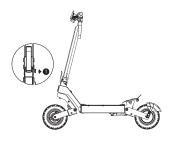

Please carefully check for any loss or damage. If so, please contact us promptly.
